3.6 Run Sharing	1 of 1	March 2009

Policy Statement

STS is committed to planning and delivering service which is safe, effective and efficient. Wherever it is possible, runs will be shared to avoid duplication of costs. Students from all partner School Boards may be transported on the same vehicle.

Procedure

STS staff will plan routes in the most effective, efficient manner possible via the computerized planning software and input from the bus company as required. Optimizations will be run at periodic times of the year to right-size or eliminate vehicles whenever appropriate.
